

The project will follow the agreed-upon **feature list**, **deliverables**, and **technical requirements** described in the project proposal.

Any request outside the defined scope—such as new features, redesigns, additional integrations, or expanded functionality—will be treated as **out-of-scope work** and billed separately.

To modify the scope, the client must submit a written request. A revised quote and timeline will be provided before any additional work begins.

- **Total Project Price:** Listed in the proposal or invoice.
- **Deposit:** A non-refundable deposit (typically 30–50%) is required before work begins.
- **Payment Schedule:** Remaining payments are due on milestone completion or on dates listed in the invoice.
- **Late Fees:** Payments overdue by **7 days** may incur a **5% weekly late fee**.

Work may pause if payments are late.

All code, designs, and deliverables remain the developer's property until **full payment** is received. Once paid in full, ownership of the final deliverables transfers to the client. The developer retains the right to reuse non-proprietary code patterns, libraries, and general techniques in future projects.

The project includes **a set number of revisions** as stated in the proposal (usually 1–3 rounds).

Revisions apply only to existing features, not new functionality.

Extra revisions beyond the included amount will be billed at the standard hourly rate.

The developer provides **free bug fixes** for issues directly related to the delivered code for **30 days after launch**.

This warranty does not cover:

- New feature requests
- Issues caused by third-party updates
- Problems arising from client-modified code
- Hosting/server failures

After the warranty period, bug fixes are billed at the standard rate.

The client agrees to provide timely feedback, content, credentials, and approvals needed to complete the project. Delays in communication may extend the timeline.

If the client becomes unresponsive for **14 days**, the project may be paused.

If unresponsive for **30 days**, the project may be terminated. Payments already made are non-refundable.

If the client cancels the project:

- The deposit is non-refundable
- Completed work must be paid for
- Deliverables are released only after all outstanding balances are paid

If the developer must terminate the project due to unforeseen circumstances, the client will receive a refund for any incomplete work.

The developer is not responsible for:

- Loss of revenue due to downtime
- Security breaches caused by third-party services
- Issues arising from client-installed plugins, extensions, or code changes

Both parties agree to keep project information, credentials, and proprietary details confidential.

By paying the deposit or approving the project start, the client agrees to all terms listed in this TOS.
